

# Friend foe competitor or parasite?

Browse through the [photo galleries](#) and choose creatures to complete the table. You can draw, name or cut and paste your animal into the table. Give reasons for your choices.

Relationship Type	Organism	Reasons
<b>Competitor</b> Another organism that competes for the same food, shelter, space, or mate.		
<b>Parasite:</b> an organism which depends on another organism (its host) from which it obtains food and protection.		
<b>Predator</b> An organism which seeks out other creatures to eat.		
<b>Collaborators</b> Collaboration involves different species benefiting each other such as some crabs and seaweeds.		
<b>Producer</b> An organism which can make its own food		
<b>Consumer</b> An organism which cannot make its own food, but must eat other organisms, or the remains of living things.
