

Predator/Prey Relationships Birds and Crabs – Score Sheet

At the end of each round of hunting calculate the results.

- In each round each bird has one guess to find a crab on the [grid](#)
- For every successful hunt one extra bird is added
- For every unsuccessful attack one bird is removed due to starvation.
- 2 extra crabs are added after every round because of reproduction.
- Enter your scores into the [spreadsheet](#) to create a graph showing the changes in population.

	Results of Attacks	Number of Birds	Number of Crabs
	Start	3	30
